

## VideoX Appliances

# VideoX<sup>®</sup> NVRs

American ingenuity. Purpose-built appliances engineered for exceptional performance, protection and resilience.

VideoX Appliances deliver activated hardware accelerated technologies like video motion detection and encryption to drive enterprise grade video surveillance recording for leading VMS in a powerful, efficient and high-performance network video recorder appliance. The VideoX platform includes Enterprise and Professional models to bring high performance and smart video analytics to critical security projects.

### ACCELERATED ANALYTICS

Arxys' unique Hardware Acceleration technology supports 50% more cameras with server side Video Motion Detection. Enjoy 24/7 Video recording with forensic-grade zero frame loss and advanced video analytics built-in.

### ACCELERATED PROTECTION

Arxys uses only Enterprise class hard drives & SSD's engineered to handle extreme heat fluctuations, equipment vibrations & 24/7 writes. 10x lower error rate, 2.5x higher MTBF hours, 3x higher duty cycle & Secure Erase (SE).

### VMS CERTIFIED

We know video surveillance, and we've put all of our know-how into these units, so you get an NVR you can count on. Arxys NVRs are Verified & Certified with the global leaders in open standards Video Management Systems.

### VIDEO OPTIMIZED

Pre-loaded, NVR Optimized VMS. ONVIF support, + Arxys Multi-VMS validated appliances eliminate VMS vendor lock-in. You can choose the right camera & VMS for your needs & budget with no vendor lock-in.
